

MoTA Scholarship & Fellowship Official Data Pack

For SIH26239 — AI-enabled Scholarship & Fellowship Management System

Research cutoff: 24 September 2026

Primary official sources: Ministry of Tribal Affairs (MoTA) and DBT Tribal

This document is a project-data foundation for the backend, rules engine, document verification pipeline, workflow engine, selection module, post-selection module and analytics dashboard described in the supplied PRD.

Accuracy policy: Current-year facts are included only where the official source currently exposes them. Where MoTA lists a newer 2026-27 document but searchable official text does not expose its clause-level contents, this pack deliberately does not invent or carry forward an old value as a current rule.

1. Executive Summary

The supplied PRD requires a scheme-agnostic engine in which eligibility, documents, workflow, selection and other scheme differences are stored as versioned configuration rather than hard-coded logic. It requires NFST and NOS to run on the same engine and a third scheme to be created without a code change.

filecite turn0file0 L7-L15

The current official MoTA scholarship page lists current 2025-26 NFST material, current 2026-27 NOS material, and current Top Class 265-institute material. The DBT Tribal registry currently lists Top Class, National Fellowship and National Overseas Scholarship as active Central Sector schemes with codes A023B, ARG45 and AZKMI.

Scheme	DBT code	Current data anchor	Use in MVP
Top Class Education for ST Students	A023B	Current MoTA page + 265 institute list	Third configurable scheme
National Fellowship for ST Students	ARG45	NFST 2025-26 advertisement + 2025-26 selection-criteria notice	Core fellowship scheme
National Overseas Scholarship Scheme	AZKMI	MoTA 2026-27 advertisement/instruction/FAQ listings + current scheme page	Core overseas scheme

Official registry source: DBT Tribal All Schemes.

2. Official Source Register

Source	What to use it for	Freshness/status
MoTA Scholarship & DBT page	Scheme descriptions, current notices, guidelines/amendments, FAQs/manuals, results, grievance/portal information	Official page checked 24 Sep 2026
DBT Tribal — All Schemes	Scheme names, scheme codes, scheme type and active status	Official page checked 24 Sep 2026
MoTA — 265 Top Class Institutes PDF	Institution reference list; institution, location, state and course columns	Official list: 2023–24 onwards
MoTA — NFST 2025–26 advertisement	Current NFST application cycle and 750-slot statement	2025–26
MoTA — NOS 2025–26 FAQ	Document upload fields and formats; baseline only	2025–26; not current 2026–27 rules
MoTA — NOS 2025–26 application manual	Portal/application stages; baseline only	2025–26; not current 2026–27 rules
MoTA — PFMS sanction pages	Financial sanction records for analytics, separate from applicant data	2025–26 / 2026–27

MoTA currently lists an “Amendment in eligibility criteria and courses covered under the NOS Scheme for ST Students from 2026–27”, an “Instruction Manual-NOS Application -2026-27”, “FAQs -2026-27”, and “NOS Advertisement 2026-27”. Those documents must control the 2026–27 NOS version. [\[cite\]turn3search0\[turn4search2\]](#)

3. NFST — National Fellowship for ST Students

Current implementation anchor: 2025-26.

Field	Verified current value / structure	Backend representation
Scheme code	ARG45	schemes.code
Annual fresh slots	750	selection.seats
Programme	2025-26 advertisement explicitly says Ph.D.; scheme page also describes M.Phil and Ph.D.	programme.enum + source
Merit basis	Merit based on Master's degree marks	selection.criteria
Preferences	Girls, Divyangjan and PVTGs	selection.preferences
Institution coverage	UGC-covered institutions, eligible deemed universities, Central/State Government funded institutions, Institutes of National Importance	eligibility/reference.rule
Duration	Entire duration of course, subject to scheme rules	benefit.duration_rule
M.Phil fellowship	₹25,000/month	benefit.monthly
Ph.D fellowship	₹28,000/month	benefit.monthly
Other benefits	Contingency and HRA as per guidelines	benefit.components

The official 2025-26 NFST advertisement states 750 fellowship slots and says the fellowship is awarded to students selected for Ph.D. programmes. MoTA also lists a specific “Selection criteria for NFST from academic year 2025-26” notice. Use that notice for detailed current selection rules, not an older generic guideline. [\[cite turn2search8 turn3search0\]](#)

Do not copy old NFST rule values into the 2025-26 version. Every rule should carry source document, page/clause, effective year and verification status.

4. NFST Data Required for the Backend

Dataset	Fields to capture	Priority
Eligibility	ST status; programme; qualifying degree; marks/grade conditions; institution conditions; current restrictions	P0
Application	Identity; academic qualification; institution; course; marks; category/PVTG/Divyangjan/gender where used by rules	P0
Documents	ST certificate; academic marksheets; admission/research/institution documents; income/PVTG/other documents only where current rules require them	P0
Selection	Seats; merit metric; preference rules; tie-breakers; current 2025-26 methodology	P0
Institution reference	Institution name, type, source clause and effective date	P0
Benefits	Fellowship by research level; HRA; contingency; duration; continuation conditions	P1
Workflow	Registration, application, verification/scrutiny, deficiency, selection, award, joining/continuation and payment events where supported by current manuals	P1

Suggested source-aware rule record:

```
{ "scheme": "NFST", "version": "2025-26", "rule_id": "NFST-E-XXX", "field": "", "operator": "", "value": "", "source_document": "", "page": "", "clause": "", "effective_from": "2025-26", "verified": true }
```

5. NOS — National Overseas Scholarship

Current implementation target: 2026–27. MoTA has published 2026–27 NOS advertisement, instruction manual, FAQ and an amendment to eligibility/course coverage. [\[cite\]](#)[\[turn3search0\]](#)[\[turn4search2\]](#)

Field	Current official value visible on MoTA	Status for 2026–27 DB
Scheme code	AZKMI	Verified current DBT registry
Study levels	Post Graduation, Ph.D. and Post-Doctoral	Current MoTA scheme page
Awards/year	20	Current MoTA scheme page
ST allocation	17	Current MoTA scheme page
PVTG allocation	3	Current MoTA scheme page
Selection	Interview-based merit list prepared by an Expert Committee	Current MoTA scheme page
Admission window	2 years to seek foreign university admission after selection	Current MoTA scheme page
Income ceiling	₹6.00 lakh/year	Current page; re-check against 2026–27 amendment before encoding
Benefits	Tuition; annual maintenance; contingency; poll tax; visa; medical insurance; air journey; incidental journey expenses	Current MoTA scheme page
Disbursement	Indian Missions abroad via Ministry of External Affairs; reimbursed by MoTA	Current MoTA scheme page

Because MoTA explicitly lists a 2026–27 eligibility/course amendment, this pack does not promote 2025–26 age, marks or course-list values into 2026–27 rules unless the current amendment is directly verified. This is intentional.

6. NOS Document Data — 2025-26 Baseline vs 2026-27

The official 2025-26 NOS FAQ specifies fresh-application uploads: DOB certificate, ST certificate, PVTG certificate, profile photo, annual family income certificate, course-specific marksheets, conversion formula where CGPA is used, and for joined candidates student ID + visa copy and joining letter. It specifies PDF for documents and JPG/JPEG for profile photo with a 50-100 KB photo size. [\[cite\]turn0search9](#)

Document key	2025-26 official description	2026-27 action
dob_certificate	10th/matriculation certificate or birth certificate	Re-check 2026-27 FAQ
st_certificate	ST certificate; community spelling per latest Gazette notification	Re-check 2026-27 FAQ
pvtg_certificate	PVTG certificate	Re-check current conditional requirement
profile_photo	JPG/JPEG; 50-100 KB	Re-check current upload specification
income_certificate	Annual family income certificate; monthly certificate not considered in 2025-26 FAQ	Re-check current FAQ
academic_marksheet	Course-dependent: PG for PhD; graduation for Master's; PG + PhD award for post-doctoral	Re-check current course rules
conversion_document	Conversion formula required where CGPA is converted to percentage	Re-check current FAQ
joined_id_visa	Student ID and visa copy in one PDF for joined candidates	Re-check current FAQ
joining_letter	Joining letter from university for joined candidates	Re-check current FAQ

This table is deliberately labeled 2025-26 baseline. It is not a claim that these exact document rules are unchanged in 2026-27.

7. NOS Application Workflow Data

The official 2025–26 NOS application manual states three application stages: Step I — registration on the National Overseas Portal; Step II — DigiLocker registration for candidates without a DigiLocker account; Step III — filling the application form. [cite]turn0search10[

Stage	System event	Backend use
1	NOS portal registration	applicant profile/auth event
2	DigiLocker registration where applicable	identity/document adapter; MVP stub
3	Application form	dynamic form from scheme version
4	Document upload	private storage + requirement validation
5	Eligibility/scrutiny	deterministic rules + AI-assisted extraction
6	Deficiency/resubmission	deficiency loop
7	Selection	scheme-specific merit/interview configuration
8	Award/admission	post-selection record + deadline timer
9	Joining/continuation	institution verification + follow-ups
10	Disbursement	ledger/status record; no payment processing in MVP

The later stages are a project architecture mapping; present them as system design unless a current official document explicitly defines the same stage labels.

8. Top Class Education for ST Students

Field	Current official value
DBT code	A023B
Scheme type	Central Sector Scheme
Target	Eligible ST students pursuing higher studies in prescribed courses
Institutions	265 premier institutes identified by MoTA
Fresh students	Scholarship is given to all eligible fresh students
Duration	Entire duration of the course
Income ceiling	Family income from all sources must not exceed ₹6.00 lakh/year
Benefits	Tuition fees, admission fees, non-refundable fees, stipend, books and computer allowances

MoTA currently states 265 premier institutes and links an updated 265-institute list and the revised 265-institute list for 2023-24 onwards. [\[cite\turn5search0\turn2search6\]](#)

Top Class should be the third live scheme because its institution/course reference list is a strong demonstration of configuration without code changes.

9. Top Class Institution Reference Data

The official 265-institute PDF contains serial number, institute name, location, state and course columns. Use it as a versioned reference list, not hard-coded application logic. [\[cite\]turn0search8](#)

Field	Purpose
reference_list_key	top_class_institutes
version	2023-24-onwards (source list label)
source_document	MoTA Revised List of 265 Institutes
effective_from	2023-24
serial_no	Official list ordering
institution_name	Official institution name
location	Official location/address text
state	Official state
eligible_course_scope	Course scope exactly as listed by MoTA
source_url	Official MoTA PDF URL
retrieved_at	Date fetched by your team
document_hash	Hash for change detection

Do not infer that an institute is eligible for every course. The official list has a course column; check both institution and course scope.

10. AI / Document Intelligence Dataset

Your PRD requires Gemini to classify documents, extract fields, return per-field confidence and evidence, flag quality issues and route low-confidence/conflicting cases to human review; it must never auto-reject. The PRD also requires synthetic or authorized documents only. [filecite]turn0file0[L295-L310]

Synthetic document class	Fields to generate	AI test cases
ST certificate	name, community, issuing authority, date, certificate number	clean, blurry, mismatch, missing page
Income certificate	family income, financial year, names, authority/date	income mismatch, old year, unreadable
Academic marksheet	institution, programme, marks/CGPA, year, name	CGPA conversion, mismatch, low quality
Admission/offer letter	university, country, programme, admission date, name	name mismatch, missing page
PVTG certificate	community/category, name, authority/date	conditional-document test
Joining letter	institution, joining date, programme, candidate	missing field/mismatch
Visa + student ID	identity number, institution, visa dates	blurred/partial/mismatch

Store model, extraction fields, confidence, evidence text, quality flags, raw response, prompt version and review outcome. Keep AI signals separate from deterministic rule results and human decisions.

11. Deficiency & Consistency Dataset

The taxonomy below is a project data model, not a claim that every category is an official MoTA deficiency code. Only categories actually observed in official notices/manuals should be marked official.

Code	Meaning	Use in system
MISSING_DOCUMENT	Required document absent	Deficiency
INVALID_DOCUMENT	Document fails stated requirement	Deficiency
LOW_QUALITY	Unreadable/cropped/blurred	AI flag
MISSING_PAGE	Expected page absent	AI flag
NAME_MISMATCH	Identity name conflict	Consistency check
DATE_MISMATCH	Date conflict	Consistency check
MARKS_MISMATCH	Form vs marksheet conflict	Consistency check
INCOME_MISMATCH	Form vs income certificate conflict	Consistency check
INSTITUTION_NOT_ELIGIBLE	Institution/course not in applicable reference list	Rules/reference check
EXPIRED_OR_OUTDATED	Document outside current accepted period	Only when official validity exists

12. Analytics / Official Financial Data

MoTA's PFMS pages provide scheme-level sanction records. For 2026-27, the Ministry's scheme-wise financial summary shows allocation of ₹340.00 crore and sanctions to date of ₹141.344 crore for National Fellowship and Scholarship for Higher Education of ST students; it shows ₹0.01 crore allocation and ₹4.930 crore sanctions to date for NOS on the same summary page. These are financial-summary figures and must not be mixed with applicant-level records. [\[cite\]turn0search4](#)

Analytics entity	Fields
PFMS sanction	scheme, FY, sanction state, sanction order number, sanction date, IFD date, amount INR, amount crore, source URL
Scheme financial summary	FY, scheme, allocation crore, sanctions-to-date crore, retrieved_at
Application analytics	count by scheme/state/stage/status, processing time, deficiency category, selection outcomes
AI analytics	document type, field accuracy, confidence distribution, review rate, flag rate, language

Your PRD's analytics endpoints include overview, by-stage, processing-time and deficiency-reasons. [\[filecite\]turn0file0L364-L369](#)

13. Source-of-Truth & Versioning Policy

Rule	Implementation
Official rule wins	Only MoTA/DBT/current scheme documents define production eligibility/benefit/selection rules.
Current version first	Use the newest effective official document for the target selection year.
Never overwrite	Keep prior scheme versions immutable.
Every rule gets provenance	source_document_id, page, clause, effective_from, retrieved_at.
Reference lists are versioned	Top Class institute lists should have versions/effective dates.
Unverified values stay out	Store as research TODO, not as production rule.
Historical data is labeled	Never present old snapshots as current.
AI is advisory	AI flags/extractions never become final rejection decisions automatically.
Synthetic demo data	Use synthetic applicants/documents; no real applicant PII.

14. Recommended Supabase Seed Structure

Core configuration tables:

```
schemes
scheme_versions
scheme_documents
source_clauses
eligibility_rules
application_fields
document_requirements
selection_rules
benefit_rules
workflow_states
workflow_transitions
reference_lists
institutions
```

Runtime tables from your PRD:

```
applications
documents
document_extractions
rule_evaluations
ai_flags
deficiencies
selections
post_selection_records
follow_ups
disbursements
grievances
audit_events
```

This follows the supplied backend PRD, which already specifies scheme versions, reference lists, applications, documents, rule evaluations, AI flags, deficiencies, selections, post-selection, disbursements and audit events. [\[filecite\]turn0file0\[L142-L228\]](#)

15. JSON Configuration Template

```
{ "scheme": { "code": "NOS", "name": "National Overseas Scholarship Scheme", "version": "2026-27", "status":  
"draft_until_clause_verified" }, "source": { "document": "MoTA NOS 2026-27 official material", "url":  
"https://tribal.nic.in/Scholarship.aspx", "effective_from": "2026-27" }, "form": {"sections": [], "fields":  
[]}, "documents": [], "eligibility": [], "selection": [], "benefits": [], "workflow": [], "reference_lists": []  
}
```

For NFST use version 2025-26 and the official 2025-26 selection-criteria notice. For Top Class use current scheme information plus the 265-institute reference list. For NOS 2026-27, populate clause-level rules only after the current 2026-27 amendment/manual/FAQ is directly reviewed.

16. Remaining Verification Queue — Do Not Treat as Current Rules Yet

Item	Why it remains open	Action
NOS 2026–27 detailed eligibility	MoTA lists a 2026–27 amendment, but searchable official page text does not expose all clauses	Read current amendment/FAQ directly; record page/clause
NOS 2026–27 course list	Explicitly affected by 2026–27 amendment	Extract exact current list from amendment/advertisement
NOS 2026–27 document list	Current 2026–27 FAQ exists	Use current FAQ, not 2025–26 FAQ
NFST 2025–26 exact selection formula	Current selection-criteria notice exists	Extract exact ordering/criteria
NFST 2025–26 detailed document list	Current manual/notice needs clause-level extraction	Use current official manual
Top Class current course eligibility	265-list course column must be mapped	Import all 265 rows and normalize course scope
Exact benefit components/amounts	Some are stated only as 'as per guidelines'	Extract current guideline tables
Official workflow states	Project state machine is architectural	Use current manuals/portal labels where available
Deficiency taxonomy	Project taxonomy is not automatically official	Extract categories from official notices/manuals

This conservative approach is intentional: verified rules with provenance are safer for SIH than guessed values that can be challenged during judging.
